As an Interior Designer in residential and commercial environments, I understand the value that thoughtful and well designed spaces add to daily life. My expertise as an interior designer includes space planning, kitchen and bathroom design, the sourcing and selection of furnishings, cabinetry, lighting, window treatments, interior element enhancements and color consultation. The interior design sensibility I advocate is echoed whether I am designing a home or selecting pieces for my retail collection. Everything that earns a place in your environment is carefully and thoughtfully curated to best suit your lifestyle. My personal blueprint in the industry began with a Masters in Interior Design from Pratt and subsequent affiliation with the Walker Group/CNI in New York before developing my own firm with clients including businesses and private residences throughout the tri-state area I welcome the opportunity to connect with you and learn more about the design project that you're considering.
